Professional Summary:

Software Engineer with 2+ years of production experience building AI-powered EdTech products at scale. Full owner of Bryt's Tutor.ai mobile app serving 1,000+ daily active students across 120+ schools. Deep expertise in Flutter, Django, LLM integration, real-time cloud systems, and adaptive learning algorithms.

Experience:

- **Software Developer R&D, Bryt Learning (Dec '23 - Present):**
 - **Ownership & Impact**
 - **Owned Bryt Tutor.ai App end-to-end** (Flutter) - flagship product with **1,000+ DAU**, **15,000+ students** across **120+ schools**. Full responsibility for architecture, feature delivery, release management, and production stability.
 - **Owned the Bryt Aspire App** (Flutter) - the student self-study app, delivering revision quizzes, unit-based practice, and learning path features.
 - **AI & LLM Features (Brainie AI)**
 - **Built Socratic Hints system** - offline **LLM-powered** pipeline generating pedagogical hints for MCQ questions with **TTS audio** (Google TTS + S3), enabling guided discovery learning.
 - **Built Brainie AI Assistant** - live **LLM tutoring agent** with **multi-model fallback** architecture via **LiteLLM**, providing real-time Socratic scaffolding and concept-gap analysis.
 - **Implemented voice-based AI interaction** - **server-side STT/TTS** integration allowing students to ask questions by voice and receive spoken responses.
 - **Adaptive Learning (Architecting)**
 - **Architecting adaptive learning microservice** - **Django** backend with **Goal Creator → Resolver → Scheduler** pipeline dynamically generating study plans based on student proficiency and mastery debt.
 - **Full-Stack Mobile & Cloud**
 - **Developed Parent Corner module** - full sub-app with dashboard, progress tracking, mastery visualizations, multilingual support using **GraphQL + Riverpod** state management.
 - **Architected offline-first sync** - **Hive** local DB + custom **Daemon queue** persisting API calls and syncing on connectivity resume with cached content delivery.
 - **Built analytics pipelines** - **PostHog + Google Analytics** integration tracking engagement time, practice rigor, session properties, and learning outcomes.
 - **Implemented scalable cloud infrastructure** - migrated **Firebase RTDB**, security rules, **Google Cloud Run Functions** to Node.js v22; optimized real-time chat for **120+ schools**.
 - **Led multilingual expansion** - **WhatsApp WA360** templates, **Urdu BrytBuzz localization**, digital content streaming to classroom TVs, and pre-primary reporting features.
- **Full Stack Developer Intern, ZealYug (Feb'23 - Apr'23):** I worked as a full-stack developer intern at ZealYug, I played a crucial role in creating a hiring platform by developing APIs for backend features like security, posts, profiles, chats and also awarded as programmer of the week for my performance.

Skills:

- **Programming Languages:** Python, Dart, C, JavaScript
- **Mobile:** Flutter (Riverpod, Hive, FCM, GraphQL, animations, responsive design)
- **Backend:** Django (ORM, REST APIs, management commands, services layer), Node.js, Express.js
- **AI/ML:** LLM integration, LiteLLM, LangChain/LangGraph, RAG pipelines (ChromaDB, embeddings, vector search), multi-agent orchestration, structured LLM output schemas, Vision OCR, TTS/STT APIs.
- **Cloud:** Firebase (RTDB, Firestore, Auth, FCM, Crashlytics), Google Cloud (Cloud Run Functions, Cloud Services), AWS S3
- **Data & Analytics:** PostHog (HogQL), Google Analytics, Firebase Analytics, SQL, MongoDB
- **Architecture:** Microservice design, layered architecture (MVVM) adaptive learning pipelines, offline-first sync, event-driven systems
- **Tools:** Git, GitHub, Postman, Android Studio, VS Code, Cursor AI

- **Platforms:** LeetCode (800+ problems), HackerRank, GeeksForGeeks

Projects:

- **DebugLens** - Paste a stack trace, it traces the call chain through your codebase (local or GitHub), identifies the **root cause via LLM reasoning**, searches **StackOverflow/GitHub Issues**, and suggests a fix. Built with Python, LangChain, Tree-sitter, FastAPI, Streamlit.
- **DocMind - RAG system** for chatting with documents. **Chunking + embedding pipeline, ChromaDB vector search** with MMR reranking, source-cited answers, and a **4-metric evaluation pipeline**. Built with Python, LangChain, ChromaDB, FastAPI, Streamlit.
- **ResearchCrew - 4 LLM agents** (Planner, Searcher, Analyst, Synthesizer) autonomously research any topic and produce cited reports. **LangGraph state machine, tool-calling, WebSocket streaming** of agent reasoning. Built with Python, LangGraph, MCP, FastAPI, Streamlit.
- **Advertisement Analyzer** (Microsoft Engage 2022) - Web app using Python, Django, OpenCV to analyze customer facial expressions via computer vision.

Achievements & Certifications:

- **Solved 800+ problems on LeetCode**, demonstrating strong proficiency in **Data Structures and Algorithms**.

Education:

- **B. Tech in Computer Science & Artificial Intelligence** | KKR & KSR Institute of Technology and Sciences, Guntur with **9.14 CGPA** (2020 - 2024)
- Completed XII (State board) from Sri Chaitanya Jr. College, Guntur with **9.53 CGPA** (2020)
- Completed X (State board) from Narayana Group of Schools, Guntur with **10.0 CGPA** (2018)

Leadership & Mentorship:

- **Leading the Bryt mobile app team** - driving technical decisions, code reviews, and architectural direction while managing deliverables across multiple apps.
- **Served as Technical Head** for the Department of Artificial Intelligence - led a team of **250+ students**, organizing workshops, hackathons, and hands-on technical events.
- **Conducted upskilling sessions** on coding fundamentals, data structures, algorithms, and emerging technologies for junior students.
